

Worksheet: Deployment Checklist & Launch Log

Lesson 7 — Launch Your Professional Website

Use this worksheet to track your progress during class and keep a record of your finished, live portfolio. Fill it in as you go — don't wait until the end.

Part 1: Deployment Checklist

Check off each box only once you've actually completed it — not "I think it's done."

- ☐ GitHub account created
- ☐ Repository created (set to Public)
- ☐ Code pushed to GitHub (via terminal commands or web upload)
- ☐ Vercel account connected to GitHub
- ☐ Site deployed on Vercel
- ☐ Live link opened and tested on a laptop/computer
- ☐ Live link opened and tested on a phone
- ☐ A classmate opened my live link successfully (not just me)
- ☐ Checked my site for typos in the bio and case studies
- ☐ Checked that all links on my site actually work (case study links, contact info, etc.)
- ☐ Repo URL and live URL both saved below

Part 2: Troubleshooting Log

Write down anything that went wrong, what you tried, and what actually fixed it. This is useful even if you fix it fast — future-you (or a classmate) may hit the same thing.

Issue	What I Tried	Fix

Part 3: My Live Portfolio — Final Record

Field	Your Answer
Live site URL	
GitHub repository URL	
Date launched	

Filled Example — Jordan R.

Deployment Checklist (example)

- [x] GitHub account created
- [x] Repository created (set to Public)
- [x] Code pushed to GitHub (via terminal commands or web upload)
- [x] Vercel account connected to GitHub
- [x] Site deployed on Vercel
- [x] Live link opened and tested on a laptop/computer
- [x] Live link opened and tested on a phone
- [x] A classmate opened my live link successfully (not just me)
- [x] Checked my site for typos in the bio and case studies
- [x] Checked that all links on my site actually work (case study links, contact info, etc.)
- [x] Repo URL and live URL both saved below

Troubleshooting Log (example)

Issue	What I Tried	Fix
<code>git push</code> kept asking for a password and failing	Tried typing my GitHub password directly a few times	Instructor said to use the browser sign-in popup instead — worked right away
Site deployed but the fonts and colors from my brand kit weren't showing	Checked my HTML <code><link></code> tag for the CSS file	The file name in my folder was <code>Style.css</code> but my HTML said <code>style.css</code> — fixed the capitalization to match
Vercel showed a build error the first time	Looked at the project settings	My <code>index.html</code> was inside a subfolder called <code>website-files</code> instead of the top level — reset the root directory in Vercel settings and redeployed

My Live Portfolio — Final Record (example)

Field	Jordan's Answer
Live site URL	https://jordan-r-portfolio.vercel.app
GitHub repository URL	https://github.com/jordan-r-codes/my-portfolio
Date launched	September 12, 2026
