

Worksheet: Social Proof & Final Portfolio Review

Course 16, Lesson 8 — Name: ____ Date: ____

Reminder before you start: Everything you write below must be real. Never invent a quote, attribute words to someone who didn't say them, or ask a stranger who never saw your work to praise it. If you don't have an endorsement yet, that's fine — leave that section of your portfolio empty or labeled "coming soon."

Part 1: Endorsement-Request Message Template

Fill in the blanks below with real information about a real person (teacher, mentor, coach, or parent) and a real project from your portfolio.

Subject: Quick favor — would you write a short line about my _____ [project name]?

Hi _____ [name],

I'm finishing up my coding portfolio for a class, and I wanted to ask if you'd be willing to write a short, honest sentence or two about the _____ **[project] I built** _____ [for your class / for the club / with your help]. It doesn't need to be long — just your real impression, good or constructive. I'll only use it if you're comfortable, and I'll show you exactly how it'll appear before I post anything.

No worries at all if you'd rather not — totally understand.

Thanks either way, _____ [your name]

Filled Example — Jordan R.

Subject: Quick favor — would you write a short line about my study-tracker app?

Hi Ms. Alvarez,

I'm finishing up my coding portfolio for a class, and I wanted to ask if you'd be willing to write a short, honest sentence or two about the study-tracker app I built for the robotics club. It doesn't need to be long — just your real impression, good or constructive. I'll show you exactly how it'll appear before I post anything.

No worries at all if you'd rather not — totally understand.

Thanks either way, Jordan

Part 2: Final Portfolio QA Checklist

Go through your **live** portfolio and check off each item. Fix anything that fails before checking it.

Check	Pass? (✓)	Notes
Every internal link works (nav, buttons, page-to-page)	☐	
Every external link works (GitHub, Canva, social)	☐	
No typos in bio	☐	
No typos in any case study	☐	
Site displays correctly on a phone-size screen (no overflow/cut-off text)	☐	
Images are appropriately sized (not oversized/slow to load)	☐	
Colors, fonts, and tone match your brand kit throughout	☐	
All 2–3 case studies are present and complete	☐	
Bio is present, current, and accurate	☐	
Contact method is present and safe (school email or contact form — NOT home address or personal phone number)	☐	
Any endorsement shown is a real, attributed, approved quote	☐	

Filled Example — Jordan R.

Check	Pass? (✓)	Notes
Every internal link works	✓	Fixed a broken "Projects" nav link that pointed to old URL
Every external link works	✓	GitHub and Canva links both open correctly
No typos in bio	✓	Found and fixed "recieved" → "received"
No typos in any case study	✓	
Displays correctly on phone-size screen	✓	Resized hero image, was overflowing on mobile
Images appropriately sized	✓	Compressed two Canva exports from 4MB to under 300KB
Brand consistent	✓	
All case studies present	✓	3 case studies: study-tracker app, school club site, Canva brand kit project
Bio present and accurate	✓	

Check	Pass? (✓)	Notes
Contact method present and safe	✓	Uses school email, jordan.r@schooldomain.edu
Endorsement section is real, not fabricated	✓	Left blank with "Endorsements coming soon" — request sent, awaiting reply

Part 3: Course Completion Self-Reflection

What am I most proud of in my portfolio?

What would I still improve if I had more time?

One goal I have for Course 17: Skills That Pay:

Filled Example — Jordan R.

What am I most proud of: My study-tracker app case study, because I explained not just what I built but why the robotics club still uses it two years later.

What would I still improve: I'd like to add a short project video walkthrough once I learn screen recording.

One goal for Course 17: I want to figure out how much I could reasonably charge if a family friend asked me to build them a small website.
