

Course 17 — Student Guide: Skills That Pay

What This Course Is

Over 8 classes, you'll turn a real skill from your Course 16 portfolio into a priced, scoped service — and run a full simulated client project from first inquiry to final handoff.

What You'll Walk Away With

- A professional service package
- A pricing worksheet
- A proposal + client/project brief
- A completed simulated client project (a strong new portfolio case study!)

Ground Rules

- We never bypass age requirements or misrepresent our age to use any platform.
- A written agreement template we use in class is for practice — it is not a real legal contract.
- Any real paid client work should involve a parent or guardian.

How the 8 Lessons Fit Together

1–2: Understand the freelance landscape and turn your skill into a real service. 3–4: Package and price that service. 5–6: Learn safe, realistic ways to find opportunities and how platforms differ by age. 7: Learn to write proposals and communicate like a professional. 8: Run a complete, safe, simulated client project — start to finish.
