

Worksheet: Skill-to-Service Builder

Course 17: Skills That Pay — Lesson 2: Turn a Skill Into a Service

Name: ____ Date: ____

Instructions: Complete each section in order. Use your Course 16 portfolio as your source material. A filled example using fictional student "Jordan R." is provided in each section — use it as a model, not something to copy.

Part 1: Skills Inventory

Pull 2–3 skills straight from your Course 16 portfolio. Only list skills you have a finished project or piece of evidence for.

Example (Jordan R.)

#	Skill (from Course 16 portfolio)	Evidence / Proof	Tools Used
1	Building basic websites	Personal portfolio site, 3 pages	HTML, CSS
2	Slide/presentation design	Debate team competition deck	Canva
3	Data tracking & charting	Class fundraiser donation tracker	Spreadsheets

Your Turn

#	Skill (from Course 16 portfolio)	Evidence / Proof	Tools Used
1			
2			
3			

Part 2: Service-Idea Brainstorm

For each skill above, brainstorm at least one possible service using the formula: **Skill + Specific Output + Specific Audience + Scope Boundary**. Aim for 2–3 ideas total.

Example (Jordan R.)

Skill	Possible Service	Who Needs This
Building basic websites	Simple 3-page websites for school clubs, delivered in 1 week, 1 revision round included	Student clubs, school teams, small youth groups without a website
Slide/presentation design	A matching 10-slide competition or pitch deck, turned around in 3 days	Debate teams, student entrepreneurs, classmates preparing for a presentation
Data tracking & charting	A spreadsheet that auto-tracks and charts a club's fundraiser or event signups	Club organizers, class fundraiser leads, event committees

Your Turn

Skill	Possible Service	Who Needs This

Part 3: My Chosen Service

Review your brainstorm. Circle or highlight the idea you can describe most confidently in one sentence. Then complete the template below.

Example (Jordan R.)

I offer **simple 3-page websites** (specific output) to **student clubs and small school teams that don't already have a website** (specific audience), delivered within **one week, with one round of revisions included** (scope boundary). This is built on my proven skill in **HTML and CSS** (skill).

Final one-sentence service statement: "I build simple 3-page websites for student clubs, delivered in one week with one round of revisions."

Your Turn

I offer _____ (specific output)

to _____ (specific audience),

delivered within _____ (scope boundary).

This is built on my proven skill in _____ (skill).

Final one-sentence service statement:

Self-Check Before You Submit

- ☐ My service names a specific, concrete output (not just a skill area)
- ☐ My service names a specific audience (not "everyone" or "anyone")
- ☐ My service includes a scope boundary (a number, timeframe, or exclusion)
- ☐ My service is based on a skill I have real Course 16 evidence for
- ☐ I could say my final service statement out loud, in one breath, without rereading it
