

Worksheet: Service Package Builder

Use this worksheet to build a complete, one-page service package for the service you chose in Lesson 2. Fill in every field — if a field feels hard to answer, that usually means it needs to be more specific, not skipped.

Your Service Package

Service Name:

What's Included (list 3–5 specific items): - _____ - _____ - _____ - _____ - _____

What's Not Included (list at least 2 items): - _____ - _____ - _____

Deliverable Format (exact format, quantity, and how it's delivered):

Turnaround Time (how long, and starting from what):

Revision Policy (a specific number of rounds — not "unlimited," not "none"):

Filled Example: Jordan R. — Simple Website Package

Use this as a model. Jordan offers simple one-page websites for local small businesses.

Service Name: Jordan's Simple Website Package

What's Included: - 1 single-page website with up to 3 sections (example: About, Services, Contact) - Business name, logo (if provided), and contact information added to the page - Mobile-friendly layout that works on phones and computers - 1 round of text/content updates before the site is considered final

What's Not Included: - Domain name purchase or ongoing website hosting fees - Ongoing website maintenance or updates after final delivery - Online store or payment/checkout functionality - Multiple additional pages beyond the 3 included sections

Deliverable Format: 1 live website page, delivered as a working link sent by email, plus a shared Google Doc listing the site's content for the business's records

Turnaround Time: 5 business days from when the business sends their logo, text content, and contact details

Revision Policy: Up to 1 round of revisions included (example: fixing text, swapping an image, or adjusting colors). Additional rounds of revisions, or requests to add new sections, are treated as a new small paid update.

Quick Self-Check Before You Submit

- ☐ Could a stranger read my Deliverable Format and know exactly what they'd get?
- ☐ Does my "Not Included" list cover at least 2 realistic things a customer might assume?
- ☐ Does my Turnaround Time say what it starts counting from?
- ☐ Is my Revision Policy a specific number — not "unlimited" and not left blank?
- ☐ Have I read the whole package back as if I were the customer?
