

Final Handoff Checklist

- ☐ All must-have features from `Project_Requirements.md` are present
- ☐ The requested revision (Events section moved up) is complete
- ☐ Site is deployed and the live link works (reusing Course 16, Lesson 7 deployment skills)
- ☐ Simple, non-technical instructions written for how the client can edit the Events list themselves (plain language, no jargon — remember, "not technical" was a stated constraint)
- ☐ A short, professional handoff message is drafted, including: what was delivered, the live link, how to make simple updates, and an invitation for any final feedback
- ☐ Nothing promised in the proposal was left out or silently changed

Filled Example Handoff Message — Fictional "Jordan R."

"Hi Priya — the Career Compass Club page is live at [link]. It includes your About section, the Events list right after the intro as requested, and a contact link for interested students. To update an event, just open the `events.txt` file I included and add a new line — instructions are in the README I attached. Let me know if anything needs adjusting!"
