

Proposal Template

(Same structure introduced in Lesson 7 — reused here for the Client Simulation.)

Client: ____ **Understanding of Need:** (what you heard in discovery, in your own words)

My Approach: (how you'll do it, at a high level)

What's Included: - ____ - ____

What's Not Included: - ____

Price: ____ *(a practice estimate — no real payment occurs)* **Timeline:** ____ **Next Steps:** ____

Filled Example — Fictional "Jordan R." → Career Compass Club

- **Understanding of Need:** Priya needs one simple webpage so the club stops relying on a group chat — it should explain the club, list upcoming events near the top, and give interested students a way to reach out.
- **My Approach:** Build a single-page HTML/CSS site (reusing my Course 16 portfolio skills), with the Events section placed prominently, deployed for free via GitHub + Vercel.
- **Included:** About section · Events list (client-editable via a simple text file) · Contact link · Free deployment
- **Not Included:** Ongoing event updates after handoff (client will edit this herself)
- **Price:** \$90 (practice estimate, simulated — not a real transaction)
- **Timeline:** 2 weeks
- **Next Steps:** "Once you approve, I'll start building and check in halfway through with a draft link."
