

Worksheet — My Presence Path

Course 18: Professional Presence & Opportunity Building — Lesson 1

Name: ____ Date: ____

Part 1: Eligibility Self-Check

Reminder: LinkedIn requires account holders to be at least 16 years old, and some countries/regions or family situations may require a higher age or additional consent. Your instructor has confirmed which path applies to you before this lesson.

1. My instructor has confirmed my path is: ☐ Path A (LinkedIn-eligible) ☐ Path B (Portfolio-first)
2. If Path A: I understand I will only create a LinkedIn account once my age/consent eligibility is confirmed, and I will keep my portfolio site updated as well.
3. If Path B: I understand I will build a "Presence" page on my existing Course 16 portfolio site instead of using LinkedIn, and that this is an equally credible path in this course.
4. Path chosen for this course: ____

Part 2: Reflection — What Should My Presence Communicate?

Answer in 3–5 sentences: What do you want a stranger — a mentor, a recruiter, a competition judge — to understand about you within 30 seconds of finding your presence (LinkedIn profile or presence page)?

Part 3: Goals for the Course — What Presence Looks Like by Lesson 8

List 3 concrete things you want your professional presence to include or show by the end of Course 18 (e.g., "3 projects with screenshots," "a clear one-line headline," "an updated skills list").

1. _____
2. _____
3. _____

Filled Example 1 — Jordan R., age 16 (LinkedIn-eligible path)

Part 1: Eligibility Self-Check 1. My instructor has confirmed my path is: ☒ Path A (LinkedIn-eligible) ☐ Path B (Portfolio-first) 2. If Path A: ☒ I understand I will only create a LinkedIn account once my age/consent eligibility is confirmed, and I will keep my portfolio site updated as well. 3. If Path B: N/A 4. Path chosen for this course: **Path A — LinkedIn-eligible**

Part 2: Reflection "I want someone who finds my LinkedIn profile to understand right away that I'm a serious student developer who's already built real projects, not just someone learning theory. I want them to see that I'm curious, that I finish what I start, and that I can explain my work clearly. Even in 30 seconds, I want my headline and one featured project to make that clear."

Part 3: Goals for the Course 1. A LinkedIn headline that clearly states my focus area (web development) and that I'm a Lumexa student. 2. At least 2 featured projects linked from LinkedIn to my portfolio site, each with a one-line description. 3. A skills list that's honest and specific — not just "coding," but "Python, HTML/CSS, Git basics."

Filled Example 2 — Alex T., age 15 (Portfolio-first path)

Part 1: Eligibility Self-Check 1. My instructor has confirmed my path is: ☐ Path A (LinkedIn-eligible) ☒ Path B (Portfolio-first) 2. If Path A: N/A 3. If Path B: ☒ I understand I will build a "Presence" page on my existing Course 16 portfolio site instead of using LinkedIn, and that this is an equally credible path in this course. 4. Path chosen for this course: **Path B — Portfolio-first**

Part 2: Reflection "I'm not old enough for LinkedIn yet, but that doesn't mean I can't have a strong presence. I want my portfolio's Presence page to show that I actually build things — not just talk about coding. I want visitors to see real screenshots of my projects, understand what I learned from each one, and know how to reach me if they want to collaborate or ask questions."

Part 3: Goals for the Course 1. A dedicated "Presence" page on my portfolio site with a clear headline and short bio. 2. A project gallery with screenshots and short write-ups for at least 3 projects. 3. A simple, safe way for people to contact me (an email link) without needing any account of my own on another platform.
